RED PALM WEEVIL

UNDERSTANDING THE PEST

THE HIDDEN THREAT

Rhynchophorus ferrugineus can cause substantial damage before clear external symptoms become visible.

WHY EARLY DETECTION MATTERS

Larvae develop within palm tissues. Monitoring and regular inspection help teams respond before damage progresses.

WATCH FOR THESE WARNING SIGNS

1 **ENTRY HOLES & FIBRE**

Openings, damaged tissue or chewed plant fibres near the crown or trunk.

2 **FROND & CROWN CHANGES**

Unexpected drooping, distorted growth or a declining canopy.

3 **SUSPECT ACTIVITY**

Unusual odours, oozing or audible internal feeding may warrant closer examination.

4 **CONFIRM THE CAUSE**

Symptoms can resemble other problems. A trained specialist should assess suspect palms.

PARKERS
PHARMA LIMITED

PRODUCT CATALOGUE

RED PALM WEEVIL

INTEGRATED PEST MANAGEMENT

ONE CONNECTED PROGRAMME

Protection combines surveillance, targeted action and good plantation management. No single product replaces a complete plan.

1

INSPECT

Survey palms regularly and record suspected symptoms.

2

ATTRACT

Deploy the appropriate pheromone and kairomone attractants.

3

TRAP & RECORD

Service traps and log adult captures to identify activity.

4

RESPOND

Assess infested palms and choose locally permitted interventions.

5

REVIEW

Use results to adjust monitoring, sanitation and follow-up.

The goal: detect activity sooner, guide field decisions and support healthier palm plantations.

PARKERS
PHARMA LIMITED

PRODUCT CATALOGUE

RED PALM WEEVIL

ATTRACTION TECHNOLOGY

PHEROMONES & KAIROMONES

A focused selection of attractants for structured red palm weevil monitoring and trapping programmes.

01

LURE

700 mg

FERRUGINEOL + FERRUGINEONE

Aggregation pheromone lure.
Designed to attract adult red palm weevils into compatible traps, supporting detection and capture within an integrated management programme.

SPECIFICATION: 700 mg / UNIT

02

ATTRACT

KIRMONE

ETHYL ACETATE
KAIROMONE ATTRACTANT

Co-attractant for trap systems.
Ethyl acetate can be used as part of a pheromone-based trapping system to support adult attraction, alongside the appropriate bait and trap arrangement.

Technical note: Trap performance depends on lure quality, suitable bait, correct positioning and servicing.
Replace and handle products according to their final labels and the local programme.

RPW Trap Con®

RED PALM WEEVIL TRAP

MONITORING & MASS TRAPPING FOR DATE PALMS

- HIGH ATTRACTION RATE
- ECO-FRIENDLY SOLUTION
- EFFECTIVE MONITORING AND MASS TRAPPING
- DURABLE & WEATHER RESISTANT

Red Palm Weevil
(*Rhynchophorus ferrugineus*)

Palm Damage

Healthy Date Palms

Contents:
1 Trap

PRODUCT DESCRIPTION

RPW Trap Con is a specially designed trapping device used with RPW Lure 700 (pheromone) for monitoring and mass trapping of red palm weevil (*Rhynchophorus ferrugineus*) in date palms.

KEY BENEFITS

- High attraction rate
- Long lasting and reusable
- Easy to install and maintain
- Suitable for date palm plantations

INSTRUCTIONS FOR USE

1. 
Place RPW Lure 700 inside the trap.

2. 
Install the trap in the field.

3. 
Place traps uniformly in the plantation.

4. Replace lure every 10 – 12 weeks.

RECOMMENDED DENSITY

1 – 2 traps per hectare, depending on infestation level.

STORAGE

Store in a cool, dry place. Keep away from direct sunlight.

CHEMICAL-RESISTANT PROTECTIVE OVERSHOES

TECHNICAL DATA SHEET

PRODUCT SPECIFICATION AND COMPLIANCE DECLARATION

PURPOSE

- Protects against pesticides and agricultural chemicals during handling and application.
- Provides liquid splash resistance (Type 6) for added safety.
- Blocks airborne particles and dust (Type 5) in the work environment.
- Offers a non-slip sole for better grip and stability on different surfaces.

TECHNICAL SPECIFICATIONS

Product Name:	Chemical-Resistant Protective Overshoes
Product Type:	Disposable Protective Boot Covers (Type 5/6)
Material:	High-quality non-woven microporous fabric with laminated chemical-resistant coating
Protection Type:	Type 5 (against airborne particles) and Type 6 (against liquid chemical splash)
Colour:	White (other colours available on request)
Sizes:	One size fits most (universal)
Design Features:	Elasticated top band, anti-slip sole, sealed seams, lightweight and durable
Sole:	Anti-slip textured sole for better grip
Height:	Up to knee height (approximately 40 – 50 cm)
Shelf Life:	5 years (in original sealed packaging)
Packaging:	Individually packed or bulk packs (model dependent)
Use:	For protection against agricultural chemicals, pesticides and contaminants in date palm plantations
Country of Origin:	United Kingdom / EU (high quality manufacturing)

PROFESSIONAL FORMULATIONS

INSECTICIDE PORTFOLIO

Parkers Pharma offers the following formulated products. Their suitability for red palm weevil management depends on the specific country, approved label and use method.

S-FENVALERATE 5% EC

Insecticide | emulsifiable concentrate

- Effective against palm pests
- Reliable performance in field conditions
- Technical data, approved applications and packaging available on request.

IMIDACLOPRID 20% EC

Insecticide | emulsifiable concentrate

- Effective against sucking and chewing pests
- Systemic action with long-lasting protection
- Technical data, approved applications and packaging available on request.

ABAMECTIN 5% EC

Insecticide / acaricide | emulsifiable concentrate

- Effective against mites and insect pests
- Supports integrated pest management
- Technical data, approved applications and packaging available on request.

REGULATORY AND SAFETY NOTICE

Do not use any formulation on palms, or by drilling, injection or another method, unless the product is specifically authorised for that crop, pest and application method in the destination market. Follow the current label and SDS.
